

16 Regulate Switching Transistors boost the most and continuous power while listening.

Germany's Mundorf M capacitor is well known in most of HI-END Audio grade, even make our product more stable and deliver the defined sound.

Designed to success with Independence Circuit with Rubycon Cap (as many as 16 chips in one circuits) delivers more accurate sound and faster result. The best handpicked material is guarantee in every HI-END brand.

Sanken's Transistor in amplifier works independently to increase dynamic range

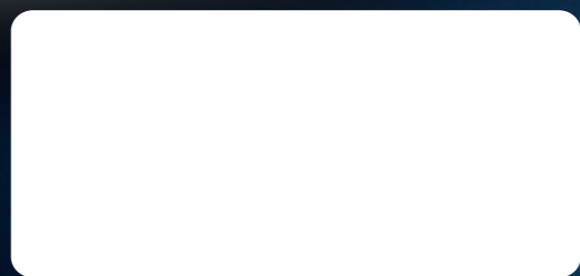

Our amplifiers are featured with IC OPAMP Analog device by Burr Brown

Toroid is designed to comprehend with audio signal while the Toroid Protection helps with the circuit

ELNA SILMICS Pre-amp capacitors is used to create the "T" sound

Are you bored with the same old choices? Are you frustrated with the promise of performance that never gets delivered to meet your expectations? Are you looking for the one definite solution to your car audio system? Look no further; let me introduce you to A brand new HI-END car Audio "HARMOTECH" the harmony and your solution to HI-END sound.

Import & Distribution by **CH Media Co., Ltd**  
 56/7-8 Rattanathibet Rd., Bangrakpattana, Bangbuathong, Nonthaburi, Thailand, 11110  
 Tel. +662-594-1003, +662-921-0331

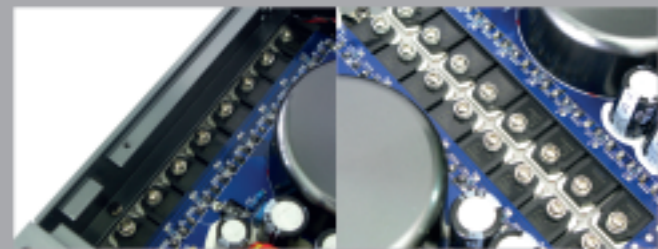

We proudly present this new creation of combined simplified concept with advanced innovation. HARMOTECH's goal is to achieve significant audio performance in every aspect. We control every step of the design, technology, and final product outcome. "HARMOTECH" is created with the professional skills and mastered with the art of innovation for all of our handpicked materials. "HARMOTECH" can assure your experience is that of a pro in your very own car. All of your problems will be solved with our one final answer, "HARMOTECH". True performance, True Solution and True Audiophile performance.

**Designed with quality and success in mind and coupled with the Independence of Circuitry**

HARMOTECH's professional technologies has been designed to allow the switching circuits to work independently. Made to perfection with the large coil as the secret weapon to be free of all sound distortion.

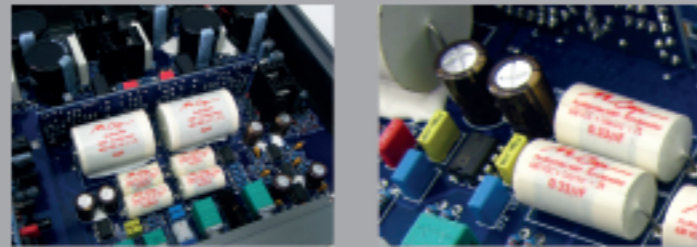

> The collaboration of ICTL494 and IC LM358 chips (as many as 16 chip in one circuits) working along with transistors to produce consistent power and deliver more accurate sound with even faster results. The best handpicked materials - The Rabycon Cap is guaranteed in every HI-END brand.

**The Excellent selection to perfection**

The capacitor in the circuitry is made of Polypropylene from M Cap which is well known and used in most HI-END Audio grade electronics, this makes our product more stable and delivers the professional defined sound quality.

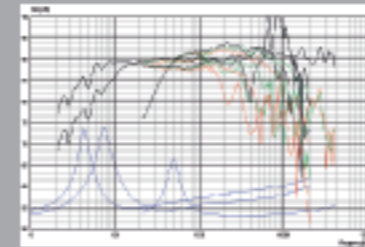

**IC OPAMP Analog Device**

Both series of our amplifiers are featured with IC OPAMP Analog OPA712 (Hi-Speed Bi-Fet OPAMP type) which is designed to have a higher input impedance. The result is to gain the most stable and best available full input signal.

If you are looking for normality coupled with the extraordinary, the name and quality of "HARMOTECH" says it all. "HARMOTECH" Speakers are designed especially for you the one who is looking for genuine sound, genuine quality and true sound of music. We are proud to initially offer two unique and among the best speakers of which consists of both series numbers H-7.3 and H-6.2. Series

**H7.3B**

Professional Sound that comes in an amateur price is a 3 pc. HI END speaker system that consists of 1" Soft Dome Tweeters with Air Circ Technology, 4" Mid-Range speakers, and 6.5" Woofers.

- Beryllium Diaphragm (99% Pure Be)
- Patented Symmetrical Drive (SD-2) motor
- AirCirc Motor Design w. 6 Neo magnets
- Large Roll Surround f. Wide Dispersion
- Aluminum Protective Grill
- Under-Hung Neodymium Motor Design
- One Piece Cone-Dust Cap
- Very Wide Frequency Response 100-10KHz
- Patented Symmetrical Drive (SD-3)
- Low-Loss Linear Suspension
- High Output 90dB @ 2.83V
- Under-Hung Neodymium Motor Design
- Black Anodized Alu. Cone
- Low-Loss linear suspension
- Patented Symmetrical Drive (SD-3)
- Exceptionally Long Linear Excursion
- Patented Design

**H2 Pure Sound Quality 2 Channel amplifier**

Power Rate 2x 320/570/780 WRMS @ 4/2/ 10hm  
1x 1070/1530 WRMS @ 4/2 0hm  
Frequency Respond 20-20,000 Hz  
Total Harmonic Distortion <0.25%  
Signal to Noise Ratio > 95dB  
Voltage Input 0.1- 8 Volt  
Dimension (W x H x D) 590x240x73mm  
Weight 8.9 Kg

high end transistors and Mundorf Mcap\*  
symmetric dual 2- channel design  
plexiglass bottom plate

**H4 Pure Sound Quality 4 Channel amplifier**

Power Rate 4x 110/205 WRMS @ 4/2 0hm  
1x 400/660 WRMS @ 4/2 0hm  
Frequency Respond 20-20,000 Hz  
Total Harmonic Distortion <0.25%  
Signal to Noise Ratio > 95dB  
Voltage Input 0.1- 8 Volt  
Dimension (W x H x D) 590x240x73mm  
Weight 9.1 Kg

high end transistors and Mundorf Mcap\*  
symmetric dual 2- channel design  
plexiglass bottom plate

**H7.3**

Superb vocal rendition and excellent imaging at all listening levels very low distortion to achieve Professional Sound HI END speaker system that consists of 1" BE Soft Dome Tweeters with Air Circ Technology, 4" Mid-Range speakers, and 6.5" Woofers.

- Beryllium Diaphragm (99% Pure Be)
- Patented Symmetrical Drive (SD-2) motor
- AirCirc Motor Design w. 6 Neo magnets
- Large Roll Surround f. Wide Dispersion
- Aluminum Protective Grill
- Very wide Frequency Range
- Coated NRSC Fibre Glass Cone (patent)
- Compact Size, Neo magnet, Alu. Chassis
- High Sensitivity 90dB / 2.83V
- SBR Rubber Surround
- Copper Cap on Pole Piece
- Superb & Rigid Aluminum Protective Grill
- Coated NRSC Fibre Glass Cone
- Low Damping SBR Rubber Surround
- Low Resonance Freq. 30Hz
- Magnet System w. Alu Ring
- Die cast Alu Chassis vented below spider
